

To connect to the Waukegan Public Library wireless network –

MAC

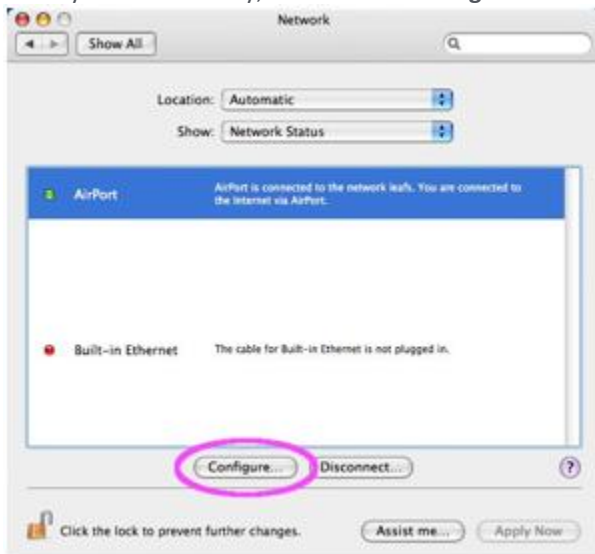

1. When connecting your Mac to a **wireless** network, one of the first things you'll want to do is make sure that the AirPort icon is enabled in your **Menu bar**. If it's already there, please skip down to Step 5.

2. Select the **Apple Button** (very upper left corner of your screen) and choose **System Preferences** from the drop-down list. From there, select **Network**.

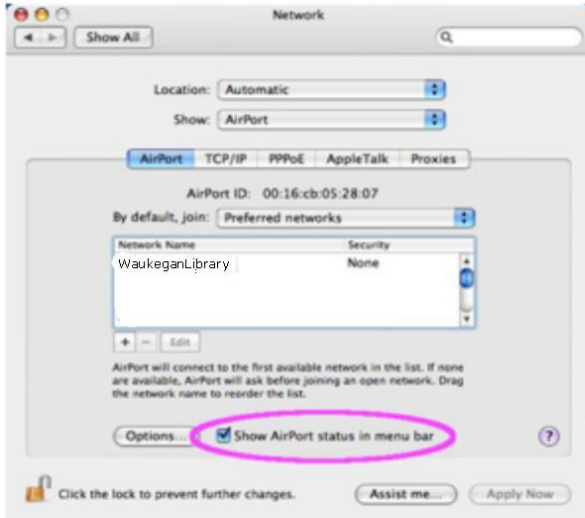

3. Select your AirPort entry, and click the **Configure** button.

4. Make sure the **Airport** tab is selected from the top menu, and then place a check in the box labeled **Show Airport status in menu bar**

5. Click the AirPort icon in your menu bar, and you should be presented with a list of visible wireless networks. Select the network **WaukeganLibrary**.

6. When you're connected, the AirPort icon will change from a 'light grey' color to a solid black. The number of solid black lines indicates the signal strength (more black bars = stronger signal). That's it!
